Order Picking Carts

NewAgeIndustrial.com

Standard Order Picking Carts

- Lighter and easier to maneuver.

New Age Order Picking Carts are designed to improve efficiency, when used with an order selector within distribution centers. The cart is made from aluminum, reducing the weight of the product by $\frac{1}{3}$ when compared to traditional steel carts. The shelves are easy to adjust, in order to fit the needs of companies that offer a wide variety of products in various sizes.

The enhancement of quick change, angled, and adjustable shelving saves time and improves utilization capabilities in comparison to other picking carts that are constructed with solid welding, making them unable to transform to meet more than one, predetermined capacity. This is why **New Age Order Picking Carts** are the preferred piece of equipment among distribution centers. Not only is it lightweight and easier to use, but it is more adaptable to fit changing needs and applications.
