

What kind of shelving do I have?

This guide is designed to help users determine what style of New Age Industrial shelving unit is being used. Photograph QR Codes with your smart phone camera or simply click on the code to be linked to the appropriate webpage.

What is the shelf made of?

We offer many different kinds of shelving, carts, and other equipment in three distinct surfaces or styles: H.D. Bar, T-Bar, and Solid Sheet — in various gauges.

T-Bar

Look underneath the shelf, each slat should be a T. The flat tops are used to create a smooth surface.

Solid Sheet

Solid Sheet shelving includes supports underneath, and most styles have a smooth, continuous edge. Some styles include a marine edge, or a 1/8" raised lip.

H.D. Bar

H.D. Bar style shelves feature bars that run laterally, or lengthwise. They're ideal for larger, heavier items.

Where is the unit located?

Freestanding - On the floor

Wall - It's mounted on the wall or suspended from the ceiling.

Overshelves - It's hanging above a table

How many posts does the unit have? What shape are the posts?

Four Posts Square Tubing

H.D. Bar

T-Bar

All-Welded Shelving

Each shelf is welded all the way around the post and will not adjust. Several configurations available.

Four Posts Round Pipe

Adjustable Shelving

The corner of each shelf has a sleeve with a set screw. Posts are marked guide with lines. Available in Heavy- or Standard-Duty.

Check out our Adjustable Shelving Guide!

Two L-Shaped Posts Rectangular Tubing

Cantilever Shelving

L-Shaped posts include unique clips that each shelf lifts and locks onto. Also available in Ceiling-Mounted.

Wall- and Ceiling-Mounted Shelving

Quick Change 2 Cantilever Shelving is suspended from the ceiling and anchored to the wall. Includes the same Lift-and-Lock shelf mechanism, built from the top, down

What is the shelf made of?

T-Bar

Look underneath the shelf, each slat should be a T. The flat tops are used to create a smooth surface.

T-Bar Wall Shelf

with Pot Rack
