

# IT TECHNICIAN CART DWG51851R

A specialized, mobile, and ergonomic workstation designed for rapid, on-site troubleshooting and maintenance of servers, switches, or storage, particularly when remote access (IP KVM) fails.

Designed for use with an Order Picker as a mobile workstation saving time and money.

Dimensions = 44" W x 87 ¾" H x 42" L  
Deck Height = 4 ⅝"  
Net Weight = 389 lbs.  
Weight Capacity = 1,500 lbs.

## These Units Are Made-To-Order

And can be customized to fit your needs. For more information, contact us today. Get a **FREE QUOTE** and explore our endless customization options.

Shelves are lined with Static-Dissipating Ultra-High Molecular Weight Polyethylene (UHMW-PE or UHMW).

*UHMW is an exceptionally tough, engineering thermoplastic featuring superior abrasion resistance, high impact strength, and a very low coefficient of friction.*

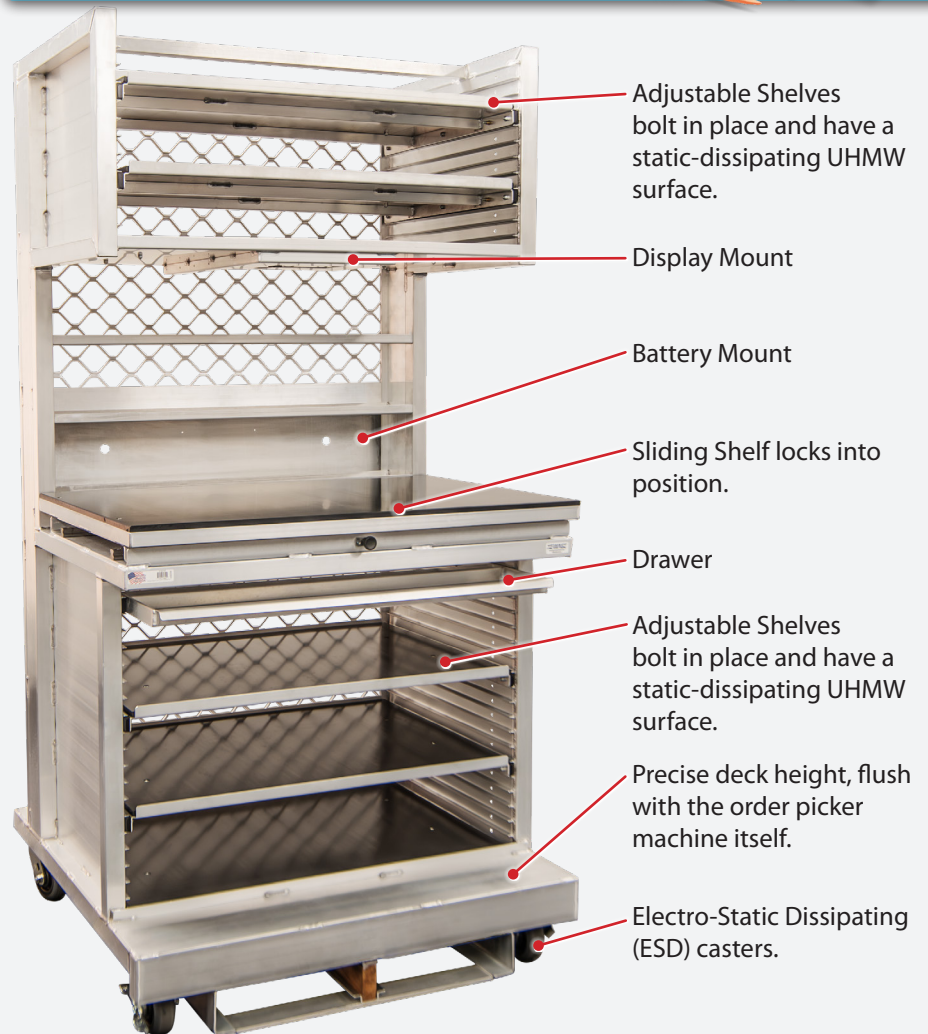

### Electro-Static Dissipating (ESD) Casters

*Electro-Static Dissipating (ESD) wheels and casters are used in almost every industrial setting where protection against electrostatic discharge is required. Electronics are particularly susceptible to electrostatic discharge generated by transport units or transported goods. ESD wheels and casters are used to prevent these discharges.*

## Key Features for Hyperscale Environments

- **Mobility & Maneuverability:** Designed to move easily between dense server racks with locking wheels and ergonomic features.
- **Durability:** Built to withstand constant, rigorous use, featuring rugged materials to support heavy equipment.
- **Functionality:** Includes built-in mounts for charging and powering equipment, as well as cable management systems to manage cords in tight spaces.
- **Ergonomics:** Adjustable shelf height settings allow technicians to work comfortably keeping within easy reach.
- **KVM Switch/Console Mount:** Mount a monitor, keyboard, and mouse for direct server access.
- **Work Surface:** Static-Dissipating UHMW surfaces on each shelf.
- **Storage Space:** Shelving and pull out drawer for tools, cables, and diagnostic equipment.

**Units Are Made-to-Order In Order To Accommodate Your Order Picker And Server Work Environment.**
